

TECHNICAL BULLETIN 4: CHANGE SEQUENCE OF INSTALLING BOTTOM DIAGONAL BRACES

The instructions show all the Bottom Diagonal Braces being installed in Steps 23 and 24. Installing the end most Bottom Diagonal Braces before installing the End Panel Assembly (in Step 34) can result in an interference between the Braces and the Shoes on the End Panel Assembly. Experience teaches us that it is better to wait and install the end most Bottom Diagonal Braces between Steps 34 and 35.

TECHNICAL BULLETIN 5: MORE DETAILS ABOUT THE SHIMS

Use these drawings to help understand the sequence and purpose of the shims and spacers in Steps 3-6.
